

This is a outrage!!!!  
Where does this lead us???  
When does it stop???

We as American's have the choice not to pay for XM radio or other's like it if we so choose, to allow other's to dictate what content is on XM is just plain censorship. This is a pay service, and as such let the consumer decide on what is and is not acceptable.

God Bless the USA, and the FCC to make the right decision!
